CYPFER Joins InfraGard National’s Cyber Readiness and Resilience Initiative to Protect U.S. Critical Infrastructure

WASHINGTON, DC – March 7, 2024 – InfraGard National Members Alliance, an FBI-affiliated independent nonprofit organization dedicated to protecting U.S. critical infrastructure, is pleased to announce that CYPFER, a global leader in providing Cyber Certainty™ to enterprises worldwide, has joined its Cyber Readiness and Resilience initiative. As a diamond sponsor, CYPFER will work with InfraGard National to produce and support educational programs that strengthen the cyber readiness and resilience of U.S. critical infrastructure.

Cyberattacks on critical infrastructure present a significant national security threat and strategic risk to the United States. On an unprecedented scale, nation-state actors and cyber criminals are attempting to disrupt the assets, systems and networks that underpin American life. Cyber Readiness and Resilience is a content-focused initiative that will include eLearning programs and webinars, conference workshops, podcasts, and social media campaigns on a variety of timely topics, including ransomware, business email compromise, theft of trade secrets, and nation-state attacks. Through education and training, Cyber Readiness and Resilience will provide security stakeholders with knowledge and resources to secure our nation’s most critical assets.

“CYPFER was purpose-built to protect, respond to, and defeat cyber-attacks,” said Alex Gross, Chief Business Officer, CYPFER. “We are committed to sharing intelligence, best practices, and actionable solutions with InfraGard® members and our nation’s security stakeholders. As a leading proponent of Cyber Readiness and Resilience, together, we will collaborate to strengthen our critical infrastructure’s cybersecurity defenses and empower them against these emerging threats.”

“Cyberspace is the most active threat domain in the world, given America’s reliance on energy, water, healthcare, information technology, and numerous other critical infrastructure sectors,” said Tom Markert, President, InfraGard National Members Alliance. “It will take a strong coalition to emerge victorious against our adversaries. As a first responder on this battleground, CYPFER not only supports businesses during major incidents, but they are also answering the call to protect critical infrastructure and our national security. We are thrilled to work with CYPFER in producing content that will help our stakeholders prepare for, respond to, and overcome cyberattacks.”

About InfraGard National Members Alliance

InfraGard National Members Alliance (INMA) is an FBI-affiliated independent nonprofit organization dedicated to protecting U.S. critical infrastructure and the American people. Established in 2003, INMA is the private sector component of the FBI's InfraGard program, which is a partnership between the Federal Bureau of Investigation and members of the private sector for the protection of U.S. critical infrastructure. INMA is comprised of 74 InfraGard Member Alliances, nonprofit organizations which represent INMA at the local level across the country. Through these alliances, law enforcement and the American business community can collaborate on educational programs, training events and information-sharing initiatives that strengthen national security and the foundation of American life.
